

FADLY UZZAKI

Product Designer | Design Engineer | Systems Thinker

Jakarta, Indonesia | fadly.uzzaki@gmail.com | +62 877 88734744 | linkedin.com/in/fadlyzaki | fadlyzaki-design.vercel.app | github.com/fadlyzaki

PROFESSIONAL SUMMARY

Product Designer and Design Engineer specializing in resilient systems, B2B SaaS, complex operational workflows, and cognitive-load-aware product design. I combine Computer Science logic with Educational Technology and Cognitive Load Theory to turn chaotic business requirements into scalable, usable workflows. Experience spans workforce tech, B2B commerce, logistics, supply chain, design systems, AI workflow tools, learning products, and coded prototypes across Web, Android, and internal tools.

CORE PRODUCT DESIGN SKILLS

Product Design, UX/UI Design, User Research, Interaction Design, Information Architecture, Wireframing, High-Fidelity UI, Logic-Based Prototyping, Design Systems, Design Ops, Design QA, UAT, Data Visualization, Workflow Design, Service Design, Behavioral Product Design, Gamification, Cognitive Load Reduction, Accessibility-Minded UX, Agile/Scrum, Stakeholder Management, Cross-Functional Collaboration.

TOOLS AND TECHNICAL SKILLS

Figma, Sketch, Miro, Jira, Mixpanel, Maze, Storybook, HTML, CSS, JavaScript, React, TypeScript, Next.js, React Router, Framer Motion, Three.js, Node.js, Express, Python, Git, Tailwind, Firebase, Google ADK, MCP, Google Cloud AI, Prompt Engineering, MLOps fundamentals.

PROFESSIONAL EXPERIENCE

Lumina | Product Designer II

May 2022 - Nov 2022 | Workforce Tech, Recruiter ATS, Worker App, Design Ops

- Designed workforce and recruitment products for blue-collar users, focusing on dignity, accessibility, trust, and lower cognitive load during job search and application workflows.
- Worked across recruiter ATS, worker app, communication flows, candidate tracking, and Design Ops.
- Designed ATS dashboard improvements that increased recruiter speed, improved data accuracy, and supported full-team adoption.
- Designed in-app chat and candidate tracking workflows to improve transparency between candidates and employers, accelerate time-to-hire, and increase candidate trust.
- Helped manage freelance design workflows and scale design output through Design Ops practices.

GudangAda | Product Designer II

Apr 2020 - Dec 2022 | B2B Commerce, Marketplace, Logistics Tech, Design Systems

- Designed product flows for Indonesia's B2B FMCG commerce and supply-chain ecosystem, translating fragmented offline operations into safer digital transaction workflows.
- Improved marketplace checkout, transaction clarity, trust cues, and buyer decision points to reduce cart abandonment, improve conversion, and increase average order value.
- Designed Official Store workflows that supported major FMCG partner onboarding, marketplace reliability, and partner confidence.
- Designed Promo Center workflows that improved promo utilization, reduced configuration errors, and supported targeted incentive mechanics.
- Built and helped govern GudangAda Design System across Web, Native Android, and internal tools.
- Unified 14 brand colors into 1 system, built 40+ components across 3 platforms, and improved engineering velocity by +35%.
- Established Design Ops practices, mentored interns, conducted design reviews, supported designer hiring, and helped scale the design team.

STOQO | Product Designer

Mar 2018 - Apr 2020 | Logistics, F&B Supply Chain, Sales App, Customer App, Warehouse Tools

- Designed logistics and supply-chain workflows for F&B businesses, helping turn unknown operational chaos into predictable data for restaurant owners, warehouse teams, and field sales users.
- Improved delivery tracking, accountability, and operational visibility, reducing support tickets and increasing delivery trust.
- Designed Sales Incentive Agent workflows that translated confusing monthly KPIs into daily, chewable goals, increasing agent activity and reducing disputes.
- Used behavioral design, cognitive load mapping, journey flows, low-fidelity and high-fidelity exploration, rollout communication, and field adoption rituals.
- Designed paper-to-paperless inventory concepts to reduce manual paperwork, speed up search, and lower operational cost.
- Contributed to Design Ops through intern mentoring and hiring support.

Early Experience and Internships

2015 - 2018 | University of Indonesia, GDP Labs, Tokopedia, Interaction Design Teaching

- Built foundations in Human-Computer Interaction, software engineering, agile product work, and fintech UX research.
- Taught or supported Interaction Design learning contexts while studying Computer Science.
- Gained early exposure to product management and agile delivery at GDP Labs.
- Researched fintech UX at Tokopedia.

PUBLIC CASE STUDIES

Lumina Workforce Ecosystem

fadlyzaki-design.vercel.app/work/workforce

Product design for blue-collar recruitment, worker journeys, ATS workflows, chat, candidate tracking, and design operations. Focus: workforce accessibility, dignity, trust, Android-first users, and lower cognitive load in job application flows.

GudangAda Commerce Engine

fadlyzaki-design.vercel.app/work/commerce

Product design for B2B marketplace trust, transaction safety, supply-chain workflows, logistics tech, and Design Ops. Focus: checkout clarity, partner confidence, promo workflows, fragmented logistics, and high-volume B2B commerce.

STOQO Operational Efficiency

fadlyzaki-design.vercel.app/work/efficiency

Product design for F&B logistics, restaurant customer apps, warehouse workflows, sales-agent tooling, and operational resilience. Focus: just-in-time delivery, perishable goods, high-churn workforce, and predictable operational data.

GudangAda Design System

fadlyzaki-design.vercel.app/case-study/design-system-gudangada

Built a scalable cross-platform design language for a B2B FMCG marketplace. Impact: 14 brand colors unified into 1 system, 40+ components, 3 platforms, and +35% engineering velocity. Covered tokens, component architecture, Storybook alignment, governance, documentation, and cross-functional adoption.

STOQO Sales Incentive Agent

fadlyzaki-design.vercel.app/case-study/stoqo-sales

Behavioral product design case converting KPI confusion into commitment and daily action through chewable goals, field adoption, agent motivation, low-literacy rollout materials, and offline sync rituals.

SIDE PROJECTS AND EXPERIMENTS

Learning Progress Architect

AI-powered learning workflow that turns broad learning goals into sequenced roadmaps, guided study sessions, comprehension capture, weak-topic reviews, and reinforcement schedules. Stack: React 19, React Router 7, Express, TypeScript, Google ADK.

Competitor Landing Page Summarizer

Autonomous UX extraction and competitor analysis tool powered by Google ADK and MCP. Stack: React, Google ADK, Model Context Protocol.

The Human Algorithm

Self-aware portfolio and experimental lab built through an agentic workflow, showing system architecture, interaction design, coded prototypes, progressive disclosure, and narrative design. Stack: React, Framer Motion, Three.js. Reported system: 26+ shipped features, 6 deprecated features, 6 layout archetypes, and 3 biological hooks.

The Productivity Illusion

Research project exploring why high motivation and gamification do not always produce real learning engagement. Stack and methods: Python, Google Colab, behavioral analytics, Self-Determination Theory framework, mixed-method research.

Year in Review

Privacy-first yearly wrap generator inspired by Spotify Wrapped. Creates aesthetic milestone stories client-side without backend tracking.

Interactive Workbook

Bilingual learning platform for secondary students with structured English lessons and gamified progress tracking. Stack: Vanilla JavaScript, Tailwind, Firebase.

Additional Concepts

The Agency Pivot: UX research and behavioral psychology around treating users like pilots, not dopamine targets. Price Lock: flight-price inflation pause button using React, Python algorithm logic, and fintech integration. The Science of Care: migrant remittance/care concept with React and LLM concierge. Flood Alert: real-time Jakarta flood evacuation concept using Node.js, PostGIS, and Flutter. Project Zen: content filtering by time and cognitive load. FilterMe: AR cosmetics trust-gap concept. Muezza: spiritual habit companion with React, TypeScript, behavior loops, progress feedback, gamification, and virtual companion interactions.

EDUCATION

Universitas Negeri Padang | Master in Educational Technology

Jul 2024 - Jan 2026

Focus: Cognitive Load Theory, Instructional Design, learning motivation, and educational interface scaffolding. Thesis topic: The impact of Duolingo usage intensity on vocabulary mastery and English motivation.

University of Indonesia | Bachelor of Computer Science

2014 - 2018

Focus: Human-Computer Interaction and Software Engineering.

CERTIFICATIONS AND CREDENTIALS

- Google AI Skills Profile | 2025 | Gen AI Agents, Prompt Engineering, MLOps.
- Google Cloud Gen AI APAC | 2026 | Generative AI, AI implementation, LLMs. Certificate ID: 2026H2S04GCGENAIAPACC1-P00669.
- Become a Product Manager | Udemy | Jul 2023 | Product Design, Product Management, Product Development.
- Digital Marketing Workshop | RevoU | Oct 2021 | Digital Marketing, SEO, Content Strategy.
- Input and Interaction | Coursera | Aug 2019 | Interaction Design, UI Design, HCI. Certificate ID: GE4JFF2ZZHYK.
- Information Design | Coursera | Jul 2019 | Data Visualization, Information Architecture, Visual Design. Certificate ID: VLX7M5BE5TFF.
- Design Kit: Human-Centered Design | +Acumen / IDEO.org | May 2018 | HCD, Prototyping, Design Research. Certificate ID: 3385-1632464.
- Conducting Usability Testing | Interaction Design Foundation (IxDF) | Oct 2018 | Usability Testing, User Research, Test Facilitation. Certificate ID: 35436.

ACHIEVEMENTS

- Gold Medal / 1st Winner, GEMASTIK9 ICT Business Development | Kemendikbud | Oct 2016.
- Top 25 Finalist, Espriex Business Model ASEAN | Univ. Brawijaya / Harvard / Stanford | Mar 2017.
